

ARTWORK SPECIFICATION FOR PRINT

For Print Artwork, please supply high res pdfs and ensure your artwork is 300dpi. Please also check, that no assets used within the print artwork is RGB as this may affect the colour of your print. For formats where a keyline is added, please make sure that your keyline is set to a spot colour and the Overprint stroke/fill option is selected in the software package you are using to create the artwork.

Artwork can be supplied at a percentage of the overall spec. For example, a 48 Sheet pdf can be supplied to us as 10% of the overall spec. If you choose to do this, please either specify on the file name or in the mail when sending the high res pdf to the percentage you have created your file to.

ROADSIDE	PANEL DIMENSIONS		SAFE COPY AREA		Recommended Materials
